
Start
Create binary tree (with given nodes)
Insert root node into queue
Initialize flag = false
Is queue empty?
Yes
The tree is complete
End
No
Remove front node from queue (temp)
Does temp have left child?
No
Yes
Set flag = true
Is flag = true?
Yes
The tree is not complete
No
Insert left child into queue
Does temp have right child?
No
Yes
Set flag = true
Is flag = true?
Yes
The tree is not complete
No
Insert right child into queue
End
